Information Technology Application

Information technology application refers to selecting and using appropriate technology to accomplish a given task. The individual is also able to apply computing skills to solve problems.

- When doing research, do you use credible sources and cite them appropriately?
- Can you develop effective PowerPoint presentations or utilize Excel to create a personal budget?
- Are you easily able to adapt to the technology used at your job or internship?

To the right are some examples of how you can enhance your information technology application skills with a political science degree:

- Campaigns & Elections – POLI 328
- Congress – POLI 323
- Doing Research in Political Science – POLI 205
- Field Internship – POLI 402 (placement dependent)
- Mock Trial – POLI 119
- Public Opinion – POLI 329
- Reading the Lowcountry Landscape – GEOG 219
- Southern Politics – POLI 330
- Urban Applications of Geographic Information Systems – POLI 310
