General Education Social Science Learning Outcome: Students apply social science concepts, models or theories to explain human behavior, social interactions or social institutions.

The Learning Outcome will be assessed through the paper on Federalism and US Marijuana Policy.

Course Objective: This course is an overview of two issues in contemporary politics: the War on Drugs and the War on Terrorism. This course is intended to familiarize you with the goals of public policy, social issues, and philosophical issues surrounding these two “wars.” The literature is to present you with a broad sample of Political Science as a field of study; there are readings on US domestic and international policy, political philosophy, comparative politics, and criminal justice. The assignments are constructed to build student research skills regarding contemporary issues, their historical backgrounds, and to lay the groundwork for more in-depth study. The course is structured in a way that connects the study of Political Science to contemporary political events, policies and debates. Quickly.
